INCIDENT RESPONSE & EMERGENCY PREPAREDNESS PLAN

PURPOSE

The purpose of this plan is to establish policies and procedures for Louisiana State University of Alexandria (LSUA) in response to natural disasters, human-made incidents, and other emergencies, as well as to ensure continuity of operations and effective recovery. This emergency plan prioritizes the protection of human life above all else. Every reasonable effort shall also be made to protect and preserve LSUA property and critical infrastructure. Recognizing that emergencies may occur with little or no warning and can vary widely in nature and scope, this plan is designed to provide flexibility in determining and implementing responses that are both effective and appropriate to the situation. The elements of this plan have been developed through a comprehensive review of emergency preparedness frameworks and best practices from institutions of higher education, as well as guidance from the Federal Emergency Management Agency (FEMA), Centers for Disease Control and Prevention (CDC), National Incident Management System (NIMS), and the Louisiana Governor's Office of Homeland Security and Emergency Preparedness (GOHSEP). This plan shall be reviewed on an annual basis to ensure its continued relevance and effectiveness. Updates will be made as necessary to reflect changes in personnel, occupancy, organizational structure, or building configurations.

Examples of different types of Emergencies:

1. Natural disasters (floods, hurricanes, tornadoes, ice storms)
2. Human-made crises (fire, explosion, train or vehicle accident involving hazardous materials, terrorism, active shooters, bomb threats, and any other proximity threats)

Emergency Operations/Response Plan

The **Incident Command System** defines responsibilities for carrying out specific actions at projected times and places in an emergency, crisis, or disaster.

An **Incident Command Post** will become the base of operations for the Command Staff.

On campus:

- Primary Incident Command Post – Chancellor's Conference Room
- Secondary Incident Command Post – University Police Department

Off campus:

- Primary Incident Command Post – Alexandria Museum of Art, 2nd Floor

Responsibilities

A. Chancellor

a. The Chancellor or his representative will evaluate the threat and order any or all of the following:
    1. Establish the Command Staff at its designated location.
    2. Call 911 and report the threat. (Provide only the basic information needed to generate a response from fire/law enforcement agencies; you do not want to inadvertently release sensitive information on the radio that can be heard on scanners throughout Central Louisiana.)
    3. Order evaluation or lock down of the campus or one or more campus buildings.

B. Command Staff

a. The primary functions of the Command Staff will be:
    1. To determine immediately the nature and severity of the emergency.
    2. To develop a plan of action with regard to safety of individuals and procedures necessary to correct the problem.
    3. To issue appropriate orders to execute the plan.
    4. To issue appropriate information to people on campus and to the media.

b. Upon notification of an emergency/threat, the Command Staff will immediately meet in the Incident Command Post, or other location, if necessary, to evaluate the situation and decide on a course of action.

c. The Chancellor or his representative will determine all actions to be taken during the emergency. Other members of the Command Staff, including civil law enforcement agencies and fire departments, will serve to provide advice and assistance.
    1. If circumstances deem that the university needs to be immediately evacuated and closed, notification will be made by the Chancellor's Office or designee.
    2. If total evacuation of the campus is necessary, faculty, staff, and students will, upon notification, immediately evacuate to the designated areas. The building supervisors at each location will be responsible for relaying all future communications from the Command Staff.
    3. If evacuation of only a portion of the campus is needed, that area will be immediately cordoned off to prevent unauthorized entry.
    4. If the decision to lock down a building or the entire campus is made, all occupants should shelter in place immediately, which would include locking doors and staying clear of windows.

d. A written log will be kept of all Command Staff actions.

C. Personnel/Building Supervisors

a. When notified, building supervisors are responsible for the total evacuation or lockdown of their respective buildings to their designated areas. The building supervisors should be familiar with their building, maintain a copy of the building floor plan, location of the crash bar key, and a copy of this plan, and keep the material updated as needed. In addition, the building supervisor should keep the Campus Safety Officer aware of any changes in order to keep this plan current.
b. After evacuation, building supervisors should request building occupants stay together.
c. Each evacuation site will have multiple building supervisors present. Some individuals may also be asked to leave to communicate with the Incident Command Post. One building supervisor must remain at the evacuation site.
d. During any incident, any faculty member in class at the time of the evacuation will assist the building supervisors by being responsible for keeping members of that class together and not letting any student leave the area. During lock down, the faculty member in a class at that time must immediately lock the door and advise students to stay away from all windows.
e. Building supervisors, assisted by any faculty members present, will assist in any relocation necessary and directed by the Incident Command Post. They may also, when called upon, assist in the search of their respective buildings.
f. When evacuated, all doors should be left unlocked, and all mission critical and personal possessions (purses, books, etc.) should be taken from the building.
g. Campus buildings, the individuals responsible (Building Supervisors, in order), and the areas to be checked are listed at the end of this plan. On campus assigned evacuation areas are listed also. A campus map with locations marked is attached.

D. Facility Services

a. Upon notification of an emergency, Facility Services personnel will take the following actions:
    1. All custodians on campus will be notified to report to the Facility Services Building and await directions from the command staff.
    2. Plant personnel and maintenance repair personnel will be on standby at designated key points for campus gas, electric, and water systems. This includes, but may not be limited to, the central plant, the water well house, and the main gas valve.

E. University Police

a. Upon activation of this plan, University Police will report to the Command Staff for specific instructions. Generally, however, University Police will:
    1. Meet arriving police/fire personnel and direct the senior individual of each separate agency to the Command Staff.
    2. Briefly outline for response teams any special instructions initially decided by the Command Staff.
    3. Act as liaison between response agencies and Command Staff

TYPES OF EVENTS

ACTIVE SHOOTER EMERGENCY PREPAREDNESS GUIDE

The safety and well-being of students, faculty, staff, and visitors remain a top priority for Louisiana State University of Alexandria. This Active Shooter Emergency Preparedness Guide is designed to provide clear procedures and response strategies that help protect the campus community during potentially violent incidents. All members of the LSUA community are encouraged to become familiar with these procedures, participate in training opportunities, and remain alert to potential safety concerns. Through planning, education, and collaboration, LSUA aims to maintain a safe and secure learning environment for everyone on campus. These are some of the key actions that provides a prioritized action plan that enhances LSUA's preparedness and response for future emergencies.

- Establish formal APD/RPSO/911–LSUAPD notification protocols.
- Increase response time for all initial messaging to students, employees and community.
- Develop pre-scripted RAVE text and social media templates for rapid deployment.
- Ensure multiple trained personnel have system access.
- Direct parents/community to official LSUA channels for updates.
- Designate LSUAPD Chief as initial Incident Commander until relieved by lead agency.
- Pre-identify two command post locations with backup power. Opposite sides of campus. Potentially look at a mobile command center.
- Acquire mobile command go-kits (keys, maps, floorplans, laptops/iPads, radios, etc.).
- Issue emergency IDs/badges for administrators and essential personnel.
- Rekey remaining buildings under current GGM system.
- Conduct joint walkthroughs for campus familiarization.
- Establish parent/media staging area off campus.
- Restrict non-essential staff from campus during emergencies.

Most organizations use the FBI/DHS "Run, Hide, Fight" framework during an Active Shooter Emergency.

1. Run (Evacuate)

- Have an escape route and plan in mind.
- Leave your belongings behind and get away.
- Evacuate regardless of whether others
- Help others escape, if possible.
- Prevent others from entering an area where the active shooter may be.
- Keep your hands visible.
- Call 911 when you're safe.

2. Hide (Shelter/Lockdown)

- Hide in an area out of the shooter's view and stay very quiet.
- Lock door or block doors, windows, close blinds, and turn off lights.
- Silence your cell phone (including vibrate mode) and remain quiet.
- Don't hide in groups.
- Stay in place until law enforcement gives the all clear.

3. Fight (Last Resort)

- Commit to your actions and act as aggressively as possible against the shooter.
- Recruit others to ambush the shooter with makeshift weapons like chairs, fire extinguishers, etc.

BOMB THREAT/TERRORISM

1. Anyone answering a call that turns out to be a chemical, biological, bomb, or other threat should pay close attention to the caller. Make accurate notes of what was said. Inform the caller that calls of this nature must be taken at the Chancellor's Office (318-473-6444). Either transfer the call to that number or ask the caller to call back at that number. Once the caller hangs up, the person answering the call should immediately notify the Office of the Chancellor. After notifying the Office of the Chancellor, complete the attached form and provide it to that Office.
2. **The individual who answered the call should speak to no one concerning the call before and after reporting to the Office of the Chancellor.**

Having a Bomb Threat Management Plan can reduce panic and ensure your organization is prepared to respond to a potentially dangerous situation. This plan assists in determining appropriate courses of action on a case-by-case basis in light of all available information. Bomb Threat Management Plans will vary in length and detail depending on the nature, size of the site location, and the assessed risk, but there are core elements that should be included in every Bomb Threat Management Plan.

Bomb Threat Management Team: The individuals whose roles and responsibilities must be identified in the BTM plan.

- **Receiving Party**. The person who receives the threat.
- **Decision Maker.** The person who oversees the activation of the plan and makes final decisions.
- **Law Enforcement Liaison.** The person who is the communication bridge between the Decision Maker and any law enforcement response.
- **Search Team Leader.** The person who oversees the Search Team.

- **Search Team.** The individuals who conduct searches related to the threat as directed by the Decision Maker.
- **Evacuation Team Leader.** The person who manages the evacuation team.
- **Evacuation Team**. The individuals who lead people to gathering areas.
- **Evacuees.** The individuals being evacuated (e.g., employees, customers, visitors, etc.)
- **Runners.** The individuals who transport equipment or messages between teams, leaders, and the Decision Maker.
- **Bomb Technician:** A public safety officer who is specially trained and certified to diagnose and lessen safe explosive threats.

FIRE SAFETY

1. Fire Department notification is the responsibility of the Chancellor or his designee. The Operating Engineer on duty will shut down natural gas and electricity to the affected areas. The Office of the Chancellor (ext. 6444), the Physical Plant (ext. 6475), and the Safety & Risk Manager (ext. 6594) should be notified of the location and severity of any fire.
2. Any person can report a fire that is a danger to life or property. If an individual personally reports a fire to the Fire Department, the Office of the Chancellor must be notified immediately of actions taken.
3. Know evacuation areas. They are attached to this plan.
4. Prepare yourself and students to evacuate the building if necessary.
5. Fire drills are conducted at least once per year in academic buildings and once a month in all residential buildings. These drills are held unannounced to staff, faculty, or students. Information of each building evacuation is recorded on LSUA's Fire Drill Report and kept by the Campus Safety Officer.
6. Fire extinguishers are inspected and certified by an outside contractor once a year.
7. **Elevator Fire Service Keys** are the responsibility of the Executive Director of Facility Services. These keys are located at Facility Services and are available in case of an emergency by calling the University Police (318-473-6427).

NATURAL GAS LEAK

1. Anyone discovering a gas leak on campus should immediately contact Facility Services. The Director of the Utility Plant will determine concentrations of gas and the source of the leak. If necessary, certain areas and buildings will be evacuated immediately using the emergency evacuation plan.
2. Director of the Utility Plant or his/her designee will shut off building gas valve or shut off a certain affected area of campus.
3. NO ONE is to operate any electrical switches of other sources of ignitions. It may be necessary to cut power to the buildings affected.

4. Director of the Utility Plant will arrange for repair of the leaks and notify the appropriate gas supplier of the situation.
5. Facility Services personnel with ventilate the building if necessary. Evacuated personnel will be allowed to return to work after the leak has been addressed and the building examined.
6. Director of Utility Plant will maintain a report of what occurred and the steps taken to correct the problem.

Tornadoes, Hurricanes, Floods, and Other Natural Disasters

BEFORE NATURAL DISASTER

- Monitor weather via National Weather Service (NWS) and state alerts
- Daily/Weekly weather briefings for Emergency Personnel
- Test the emergency messaging system once a semester
- Maintain emergency supplies and backup systems
- Identify shelter areas and evacuation routes

DURING NATURAL DISASTER

- Monitor local Radio/TV and emergency notification applications for weather watches and warning
- If warnings are issued, broadcast appropriately through mass information system
- Prepare yourself and students to evacuate the building if necessary
- Follow advice presented in university announcements
- If a tornado warning is issued, take shelter immediately. Building Supervisors will be asked to lockdown buildings until the weather has passed.
- In the event that a lock down or “shelter-in-place” is called, immediately lock all doors and turn off all lights and remain there until further notice is given.
- Report critical weather information to Rapides EM and NWS.
- Any relevant weather observations should be reported to NWS by the Campus Safety Officer or any on-duty Police Officer by calling 337-477-5285.
- Remain Calm

AFTER NATURAL DISASTER

- If damage is found, report to NWS with a guess as to the initial cause
- Only enter disaster areas if it is essential
- Do not bring lanterns, torches, or lighted cigarettes into buildings that have been flooded or damaged because of the possibility of leaking gas lines or flammable materials
- Do not attempt to turn on lights in a building that may have a leaking gas line, as the spark may ignite the gas

- Do not touch fallen or damaged electric wires
- Immediately leave the area upon discovering a leaking gas line

PROXIMITY THREATS

Proximity threats are hazards generating from what is located near or around LSUA, things outside your direct control that could impact safety, operations, or continuity. "Hazards arising from the physical closeness of dangerous conditions or activities to students, staff, or infrastructure, increasing the likelihood of exposure or incident."

RAILROAD, U.S. HIGHWAY 167, AND AIR TRAFFIC

- Railways operate through Rapides Parish
- Risks: Train derailments and Hazardous cargo releases (chlorine, petroleum, etc.)
- LSUA is near major roads like U.S. Highway 167 and local arterial streets
- Risks: Vehicle crashes, Hazardous material spills (fuel, chemicals), and Congestion delaying emergency response
- Alexandria International Airport (AEX) is close
- Risks: Aircraft accidents or emergency landings and Fuel fires

LOCAL INDUSTRIAL AND CHEMICAL HAZARDS

- Central Louisiana has: Manufacturing plants, Fuel storage/distribution sites and Agricultural chemical storage
- Risks: Chemical releases, Explosions or fires, and Toxic plume exposure

HAZARDOUS MATERIALS TRANSPORT

- Chemicals transported through the region by Trucks and Railways
- Risk extends even if no major plant is adjacent

Here is a quick summary table that streamlines the **Proximity Threats** around us:

Category		
Transportation	Hazmat spill on highway	Evacuation/shelter-in-place
Industrial	Chemical release	Health hazard exposure
Natural	Flooding	Campus closure
Utilities	Power outage	Operational disruption
Community	Local crime	Campus safety risks
Infrastructure	Telecom failure	Emergency comms breakdown

CIVIL DISTURBANCES

Civil disturbances are generally riots, demonstrations, marches, and groups that have become riotous or threatening to an individual.

- Restrict employee and visitor movement in your area
- LSUA is a smaller campus so there will be a faster crowd buildup in limited spaces
- Stay away from disturbance areas, do not engage or provoke crowds, and follow official LSUA alerts
- Prepare for lockdown, relocation, or evacuation
- Establish Incident Command System (ICS) structure
- Notify your local law enforcement immediately and then the Office of the Chancellor

ORGANIZATIONAL STRUCTURE

The **Command Staff** sets objectives and priorities and has overall responsibility for the outcome of incident or event. The Incident Commander has the ultimate authority assisted by the vice chancellors, Campus Safety Officer, law enforcement, Information Officer, and liaison as needed.

EMERGENCY COMMAND STAFF (KEY STAFF)

- Incident Commander/Chancellor: Elizabeth M. Beard, Ph.D.
- Vice Chancellor for Academic Affairs: Nathan Sammons, Ph.D.
- Vice Chancellor for Operation and Chief Operating Officer: Jeff Langston, MBA, MHA
- Executive Vice Chancellor for Administration and Chief Financial Officer: Amanda Cain
- Vice Chancellor for Enrollment and Student Engagement: Abbey Bain, Ph.D.
- Safety and Risk Manager: Ross Bryant
- Executive Director of Facility Services: Chad Gauthier, FNP-C
- Director of IT Operations & Support: Richard Robinson
- Chief of Police: Don Collins
- Chief Information Officer: Jason Normand
- Senior Executive Assistant to the Chancellor: Laura Fowler
- Assistant Vice Chancellor for Strategic Communications: Adam Lord, M.A., M.A.T.

Provisions for **Unified Command** will follow National Incident Management System (N.I.M.S.) criteria where incidents involve jurisdictions from off campus.

CRITICAL COMMUNICATION PLAN

The Director of Media Relations at the direction of the Incident Commander and LSUA Chancellor shall be responsible for all communications during the crisis. These include campus communications as well as public announcements. A "Press Desk" shall be established in the Incident Command Post (ICP) to facilitate press briefings.

Evacuation/Lock Down Communication:

If a decision is made by the Command Staff to evacuate or lock down a campus or building, communication to this effect will occur:

1. Telephone calls to building supervisors; voice mail alerts.
2. RAVE text messages
3. Campus-wide emails
4. LSUA website banner notification
5. 9-1-1 center
6. Radio notification to custodians, plant personnel
7. LSUE notification (students, staff, faculty)
8. AMOA notification
9. Allied Health Center notification
10. Change voice mail on main line

Internal Communications Systems:

Current capabilities

- Immediate message posting on LSUA website
- Voice messages to all LSUA phone voice mailboxes
- Email notification to all LSUA email accounts
- PA system (external)
- Posting on course management system (Moodle) homepage
- Satellite communications system
- Text messaging to registered cell phones

External Communications Systems:

- Public television
- Public radio
- Cable television
- Newspapers

Responsibilities

▪ Overall Responsibility	Adam Lord
▪ Campus-Wide Email	Chad Gauthier/Jeff Langston
▪ Emergency Text Message	Jason Normand/Chad Gauthier
▪ Website / Moodle	Ashley Robinson/Jason Normand
▪ Notify Rapides Parish 911	Police Chief/officer on duty

Key Staff

Command Staff:

▪ Incident Commander: Chancellor	Dr. Elizabeth Beard
▪ Safety Officer: Safety & Risk Manager	Ross Bryant
▪ Law Enforcement: University Police Chief	Donald Collins
▪ Information Officer: Strategic Communications	Adam Lord
▪ Liaison Officer: Assistant to Chancellor	Laura Fowler

Planning Section:

▪ Vice Chancellor for Academic Affairs/Provost	Nathan Sammons
▪ Vice Chancellor for Finance and Administration	Amanda Cain
▪ Vice Chancellor for Student Engagement	Dr. Abbey Bain
▪ Registrar	Bobi Sue Delaney

Operations Section:

▪ Procurement Services & Property Management	Brooks Davis
▪ Financial Aid	Jeff Massey
▪ Facility Services	Chad Gauthier
▪ IET Services	Jason Normand
▪ Academic Deans	Dr. Beth Whittington Dr. Nathan Sammons Dr. Brenda Ellington Dr. Ryan Riche Dr. Rafael Moreno
▪ Building Supervisors	(as needed)

Logistics Section:

▪ Food Service	Marlene Cease
▪ Oaks Housing	Hannah Boyett
▪ Facility Services Supervisors	Donnie Jeansonne James Mitchell Sid Lemoine
▪ Library	Lillian Purdy
▪ Accounting/Bursar	Meagan Chatelain
▪ Budget	Lisa Smith
▪ Additional Faculty & Staff	(as needed)

Specific Building Information

See evacuation map appended to this document

1. Coughlin Hall — Evacuation Area E1

Kimberly King	Ext. 6459
Sarita James	Ext. 6459

First Floor	Second Floor
Nursing Suite	Nursing Labs
Auditorium	Computer Labs
Faculty Offices	Classrooms
